

PARCO LOCALE DI INTERESSE SOVRACOMUNALE DELLA VAL SANAGRA (SANAGRA VALLEY INTERMUNICIPAL PARK)

You can find this point of interest in Menaggio - Path 1 - Stage 1

DESCRIPTION

Val Sanagra is a splendid valley in the heart of the Lepontine Alps, taking its name from the stream which enters Lake Como at Menaggio. Sanagra Valley's main feature is the wilderness of its environment, a mosaic of woods, grasslands and mountain pastures. The conservation of natural heritage, the lack of growing urbanization, and, by contrast, the ease of communication and accessibility render this valley one of the most interesting areas of Lake Como.

In 2005, further to the endeavours of the municipalities of Grandola ed Uniti and Menaggio, a Local Park covering the above inter-municipal area (Parco Locale di Interesse Sovracomunale – PLIS) was created in the Sanagra Valley in order to safeguard its naturalistic, historical, and anthropical features.
